Dianne Waddington (Social Worker)

Andiswa Sigadla (ENA-HBC)

Tersia Burger (CEO, Stepping Stone Hospice)

Margi Bollman (Professional Nurse)

Marshia Maningi (Home Based Carer)

During the last decade, there has been significant shift from hospital centered to Home Based Care (HBC), both in the Public and Private Health Sectors. In the Public Health Sector, the shift has been driven by the National Department of Health (NDoH) Strategy for the Reengineering of Primary Health Care (PHC), and in the Private Health Sector, it has been driven by the spiralling costs of hospital care. So much so, that some Medical Aids have even established their own Home Based Care programmes and are exploring establishing "hospital" @ home. The purpose of this workshop is:

- To contextualise Home Based Care within the South African healthcare system
- To present the NQF 2 and NQF 3 Occupational Qualifications for Home Based Carers
- To present and discuss the Hospice Home Based Care Inter-disciplinary Model
- To identify and discuss the modus operandi and respective roles of members of the Interdisciplinary team (i.e. Medical Practitioners; Professional Nurses; Social Workers; and Home Based Carers) in the delivery of Home Based Care.
- To streamline Home Based Palliative Care as an integral part of the continuum of Palliative Care from diagnosis with a life-threatening illness, through end-of-life and bereavement.

08:00	Welcome and introduction	Dr Ewa Skowronska
08:15	Home Based Care within the S.A. healthcare context	Josef Lazarus
08:45	Training of Home Based Carers	Sonia Thomson; Lerato Rangaka, Fiona Shraga, Marshia Maning
09:15	The Role of the Inter-disciplinary Team in the delivery of Home Based Palliative Care	Helderberg Hospice Team, Stepping Stone Hospice Team
10:15	Tea / Coffee	
10:45	Key Questions for Workshop Discussion	Dr Ewa Skowronska
11:00	Workshop Discussion	
12:00	Workshop Summary & Close	

The outcome of the workshop will contribute towards a Position Paper on Home Based Palliative Care within the South African healthcare context.
